

The Class-A Amplifier Site

This site is primarily dedicated to the Class-A amplifier designed by John Linsley Hood, which was originally published in Wireless World in April 1969 (with a postscript in December 1970) and later updated in Electronics World in September 1996. However, other Class-A design articles by Jean Hiraga, James Sugden, Stan Curtis and L Nelson-Jones have been added, along with some more JLH circuits. Schematics for other Class-A amplifiers and for three classic Class-B commercial amplifiers, the NAD3020, the Cyrus 1 and the Sugden A48-II, have been included for reference.

Index	<u>Last Updated</u>
The JLH Class-A Amplifier	1 May 2004
Other JLH Amplifier Designs	12 January 2002
Other Class-A Amplifiers	19 July 2004
Classic Class-B Schematics	17 August 2003
JLH Power Amp Schematics	18 January 2007
