The screenshot shows the 'Log' window of the 'NetworkMiner' application. The window contains a list of network events. Each event is represented by a small icon (a green circle, a blue arrow, or a red X) followed by a status label (e.g., 'SS Active', 'SS Inactive'). The events are listed with their timestamps, IP addresses, and hex data. The list is scrollable, showing events from 24.915ms to 72.545ms.

Timestamp	Status	IP Address	Hex Data
24.915ms	SS Active		
24.953ms	SS Active	33.017ms	80 01 02 03 04 00 00 00
24.953ms	SS Active	33.017ms	00 00 00 00 FF FF FF FF
33.145ms	SS Active	34.041ms	00
33.145ms	SS Active	34.041ms	FF
34.115ms	SS Inactive		
34.525ms	SS Active		
34.553ms	SS Active	42.617ms	80 02 03 04 02 02 02 02
34.553ms	SS Active	42.617ms	02 64 00 00 FF FF FF FF
42.745ms	SS Active	43.641ms	01
42.745ms	SS Active	43.641ms	FF
43.714ms	SS Inactive		
44.123ms	SS Active		
44.153ms	SS Active	52.217ms	81 03 04 FF FF FF FF 01
